

Java Viva Questions & Answers (BCA Level)

Java Viva Questions & Answers (BCA Level)

1. What is Java?

Java is a high-level, object-oriented programming language.

2. Who developed Java?

Java was developed by James Gosling at Sun Microsystems.

3. What is JVM?

JVM (Java Virtual Machine) runs Java programs on different systems.

4. What is JDK?

JDK (Java Development Kit) is used to develop Java programs.

5. What is JRE?

JRE (Java Runtime Environment) provides libraries and JVM to run Java programs.

6. Why is Java platform independent?

Java is platform independent because Java code runs on JVM.

7. What is OOP?

OOP stands for Object-Oriented Programming.

8. What are the main features of Java?

- Platform independent
- Secure

- Simple
 - Object-oriented
 - Robust
-

9. What is a class in Java?

A class is a blueprint for creating objects.

10. What is an object?

An object is an instance of a class.

11. What is inheritance?

Inheritance allows one class to use properties of another class.

12. What is polymorphism?

Polymorphism means one method can perform different tasks.

13. What is encapsulation?

Encapsulation means wrapping data and methods into one unit.

14. What is abstraction?

Abstraction means hiding implementation details and showing only important features.

15. What is a constructor?

A constructor is a special method used to initialize objects.

16. What is the default value of int in Java?

The default value of int is 0.

17. What is the default value of boolean in Java?

The default value of boolean is false.

18. What is method overloading?

Using same method name with different parameters is called method overloading.

19. What is method overriding?

Redefining a parent class method in child class is called method overriding.

20. What is the difference between == and equals()?

- == compares memory addresses
 - equals() compares values
-

21. What is an array?

An array stores multiple values of the same type.

22. What is a package in Java?

A package is a collection of related classes and interfaces.

23. What is exception handling?

Exception handling manages runtime errors in a program.

24. What is the use of try-catch?

try-catch is used to handle exceptions.

25. What is multithreading?

Multithreading allows multiple tasks to run simultaneously.

26. What is the main method in Java?

The main method is the entry point of a Java program.

```
public static void main(String[] args)
```

27. What is the difference between C++ and Java?

- Java is platform independent
 - Java does not support pointers directly
 - Java uses JVM
-

28. What is String in Java?

String is a class used to store text.

29. What is garbage collection?

Garbage collection removes unused objects from memory automatically.

30. What are access modifiers in Java?

- public
 - private
 - protected
 - default
-

Important One-Line Viva Answers

- **Full form of JVM:** Java Virtual Machine
- **Full form of JDK:** Java Development Kit
- **Full form of JRE:** Java Runtime Environment
- **Java file extension:** .java
- **Compiled Java file extension:** .class
- **Keyword used for inheritance:** extends

- **Keyword used to create object:** new
- **Parent class is also called:** Superclass
- **Child class is also called:** Subclass
